

State of the Basin

Hardest Working River in America?

Approximately 2 million people get water from the mainstem river/lake system.

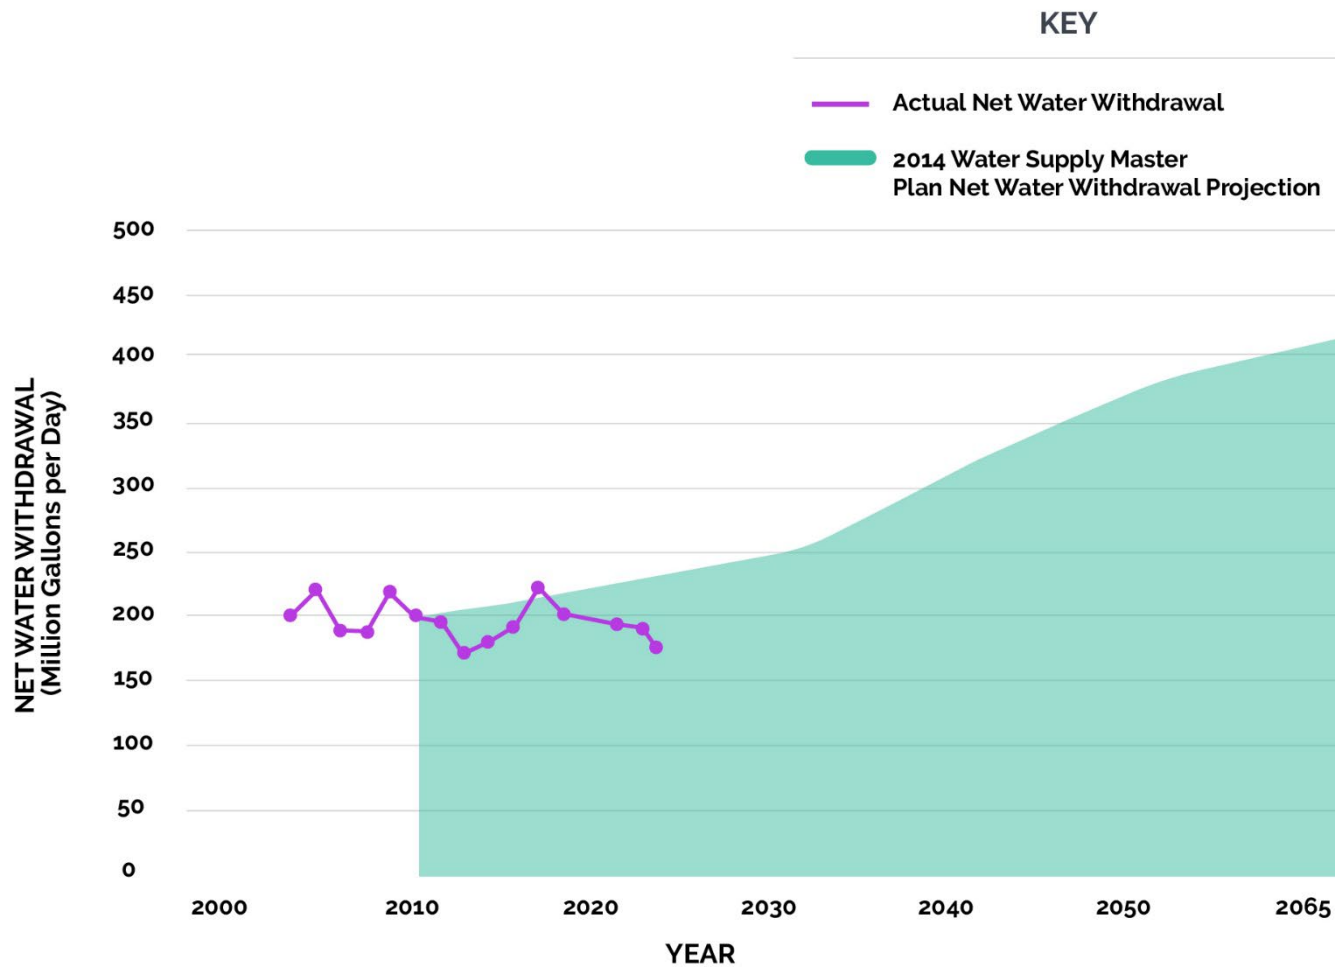

Natural inflow and natural evaporation are annual averages from hydrology data set used in CHEOPS™ model

Water withdrawal amounts are for 2020 and total 175 mgd

* mgd = million gallons per day; BG = Billion Gallons.

Projected vs Actual Net Withdrawal

YEAR	NET WITHDRAWAL
2011	202
2012	199
2013	175
2014	184
2015	196
2016	224
2017	205
2018	193
2019	189
2020	173
